CAPABILITY STATEMENT FABRICATION AND INSTALLATION

JPC Engineering can manage all stages of engineering projects from initial concept to final installation.

By combining our own skills with those of our enterprise partners and sub-contractors, we can work through the entire complex process from initial hand-sketch to installation and commissioning of the operational product.

We can call upon a wide range of expertise and experience to deliver a top-quality outcome for your engineering requirements, utilising:

- Site reverse engineering and measuring
- Budget estimates
- Material take-offs
- Concept design 3D CAD
- Detailed design and engineering
- Engineering certification and design checks*
- Manufacturing drawings, 2D drafting
- Laser cutting*
- Machining*
- Fabrication*
- Site installation*

* These services carried out in conjunction with our enterprise partners and sub-contractors, under our strict supervision

JPC Engineering and our associate companies are all fully covered by insurance for Workcover, Public and Product liability, professional Indemnity for Engineering Certification, and Fabrication and On-Site Installation
